

21<sup>st</sup> October 2020

## Update to the letter sent on Monday 19<sup>th</sup> October

### End to the self-isolation period for your child

Dear Parent/Carer

I am pleased to say that following further work with Public Health Advisors and having completed our own in-school track and trace we have been informed that your child can now return to school. **Your child should therefore return to school, at their normal start time, tomorrow Thursday 22<sup>nd</sup> October 2020.**

Any families with children who must continue to self-isolate have been contacted separately.

I would like to thank you for your support and to reiterate that your child's safety is our main priority.

It is important to remain vigilant and adhere to advice from Public Health England and as such I have provided the information below;

### What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when symptoms appeared as advised in <https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance>

You should arrange for testing for your child via <https://www.gov.uk/guidance/coronavirus-covid-19-getting-tested> or 111.nhs.uk or primary care

All other household members who remain well must stay at home and not leave the house for 14 days.

The 14-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able to, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period

### Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from NHS 111 at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/or-by-phoning-111>.

### How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19:

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

### Further Information

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

Yours faithfully

**Mr K Green**  
Principal
